 07842323263

 West Wing
St Bartholomews Hospital

This one day course will include hands on experience with a variety of biopsy techniques including core biopsy, localization techniques, vacuum biopsy, vacuum excision and tomosynthesis biopsies.

Dedicated sessions for complex cases in the breast MDM, breast tomosynthesis and breast MRI tutorials.

Led by the Barts Breast Radiology team, delegates will be in small group for hands on experience.

This course is suitable for consultants, breast radiology SpRs, advanced practitioners, and consultant mammographers.

This course provides 8 CPD credits in accordance with the CPD Scheme of the Royal College of Radiologists'.
